Summary

Ambitious Computer Science undergraduate skilled in full-stack development, AI, and machine learning. Proven track record of delivering innovative projects at hackathons and in collaborative teams.Enthusiastic about building scalable solutions using modern web and AI technologies.

Education

Amrita Vishwa Vidyapeetham, Coimbatore *B.Tech in Computer Science* *Aug 2024 – Aug 2028*

- CGPA: 8.76

Experience

Hackathon Experience

- Participated in multiple hackathons, building end-to-end solutions involving **Agentic AI workflows and web applications** under 12–48 hour time constraints.
- **Won 2 hackathons**, with projects evaluated on innovation, technical execution, and real-world applicability.
- Collaborated in team-based environments using **React, Node.js, Python, SQL databases**, and real-time API integrations.

Projects

Stock Analysis Bot: *Python, LangGraph, Gemini API, Yahoo Finance API (Dec 2025)* GitHub Repository

- Developed an AI-powered stock analysis chatbot providing real-time market data, news summaries, and actionable investment recommendations.
- Integrated LangGraph, Groq LLM, and Gemini API to orchestrate data retrieval and generate structured, evidence-based insights efficiently.

ExamGenius: *React.js, Express.js, Gemini-API, Groq, Tavilly (Mar 2025)* GitHub Repository

- Built an intelligent educational platform generating personalized study plans and curated practice materials using Gemini AI.
- Implemented secure authentication with JWT tokens and role-based access control for scalable, compliant backend.

Symbol Classifier: *Python, PyTorch, CNN, Jupyter Notebook (Mar 2025)* GitHub Repository

- Trained a CNN to classify handwritten mathematical symbols with 86%+ precision using TensorFlow and custom dataset preprocessing.
- Applied data augmentation and hyperparameter optimization to enhance model performance and reduce overfitting.

Vita-Care: *React.js, FastAPI, Gemini AI, WhatsApp Integration (Jan 2026)* GitHub Repository

- Developed a voice-integrated healthcare coordination platform enabling patients to manage appointments, prescriptions, and medication reminders using natural language commands.
- Leveraged Gemini AI and a microservices architecture (React frontend, FastAPI backend, Node.js WhatsApp bridge) to automate scheduling, notifications, and reminders directly to patients' phones.

Skill Set

Languages: C, C++, Python, Java, JavaScript, Go
Frameworks: React.js, Node.js, FastAPI, Express.js, Langchain, Langgraph
Development Tools & Technologies: Docker, Git, GitHub, Linux, Figma, MySQL, PostgreSQL, MongoDB

Achievements

- Won **Hack101** hackathon for **FlixTogether**, a group-based movie recommendation platform.
- Secured **3rd Place** in the **Build2Break** hackathon at **Anokha 2026** for developing **Vita-Care**.
